Experience

 Backend Developer @Footprintku AI   2024.12 ~ Present

- Developed backend APIs for an upcoming platform using PHP / Laravel , ensuring alignment with business logic. Managed and optimized MySQL and MongoDB databases to enhance system performance and stability.

Project

LunchOrdering

- This application allows users to create new restaurant entries or start a group order from an existing restaurant. The detailed order page organizes information in a clear and readable format, making it easy to manage and review.

`Node.js` `Express` `MySQL` `MVC` `REST API`
